

ANNOUNCEMENT UPDATE

August 31st, 2018

As we first updated you in April 2018, Align Aerospace, has decided to move our main logistic hub, currently located 21123 Nordhoff Street, Chatsworth, California, to a new building offering:

- ✓ More warehouse space
- ✓ An open plant layout allowing for improved product flow and process efficiency
- ✓ Close proximity (<2 miles) to our existing location easing transfer of product and reducing employee retention risk

We wanted to reach back out to you today to provide you with an update on how our plans were progressing and ensure our focus to have no disruptions to our service during this process.

Each week new exciting steps are completed. Most recently these included:

- ✓ Installation of racks & conveyor system
- ✓ Installation of interior office cubicles
- ✓ Completion of our Technology Operations center

The move continues to be on-track to be executed in September 2018 and our next step is to begin moving product. This exciting step begins after hours on September 7th. Align will launch a second shift with staff working in the evenings and overnight transporting material to the new building. The second shift effort allows us to continue our normal daily pick/pack/ship activities in support of our customers while efficiently moving the inventory to our new logistic hub. Beginning September 17th all inbound materials will be directed to the new hub for inbound inspection & stock put-away. During this time we will be able to ship from both locations at the same time.

With a month left for the move we remain confident that Align will be substantially moved and operating in our new DeSoto Avenue facility by the end of September.

Again, our full new address will be:
9401 De Soto Avenue, Chatsworth, CA 91311, USA

We thank you for your business, and remain available for any clarification you might need.

Best Regards,

Jérôme de Truchis
Chief Executive Officer
